Motion For Release Under COVID-19/CARES  
Act Law / Compassionate Release

This motion is to request immediate release due to the COVID-19 pandemic which has created extraordinary and compelling circumstances that require consideration for home confinement.

Time is of the essence.

Waiting for the virus to arrive is inhumane. The Coronavirus has proven to swiftly spread throughout prisons. At this time over 100 federal facilities have been infected with unacceptable numbers of infections and fatalities.

My medical conditions includes hypertension, BMI greater than 30%, chronic upper respiratory infections and a smoker of 21 years. Therefore, I meet all of the required criteria under the CARES Act and compassionate release with the COVID-19 Supplement 18 U.S.C 3582 (c)(1)(A).

This court has the authority to provide for home confinement as explained in United States vs Paulios (April 21, 2020.) As an initial matter, the administrative allowances expanding the availability of home confinement provided to the BOP by the CARES Act do not limit or supersede the discretion afforded to the court pursuant to the amended version of 18 U.S.C 3582 (c)(1)(A). Under the FIRST STEP ACT, it is for district court's to determine whether there are grounds for compassionate release, not the BOP. Moreover, the court's compassionate release discretion pursuant to 18 U.S.C 3582 (c)(1)(A) says incarceration is not limited to a federal facility as home confinement

is a form of incarceration. At this time home confinement is the only option for my safety. This facility and surrounding hospitals are unable to provide attention when the virus arrives.

The BOP is neglecting to follow the authority given to them by Attorney General William Barr to evacuate inmates who are at camps and minimum risk to the community. This demonstrates their failure to comply to reduce the population and protect from the virus. It's well documented the BOP is endangering lives of individuals who are entrusted into their care by failing to establish consistent and effective safeguards to protect inmates and staff from the coronavirus. Recently the warden at FPC Alderson removed 17 workers last week from general population. These inmates were exposed to the majority of the population due to their jobs. This was reckless after 100+ days on lock down.

In conclusion I remind this court the rate of fatality in West Virginia is increased to an all time high and the admission rate to hospitals have resulted in a shortage of beds and respirators. When the coronavirus arrives at FPC Alderson it will be disastrous. The CDC guidelines confirm I am at high risk and more vulnerable to contracting the coronavirus.

Contracting the virus with my health conditions could result in a fatality more so than one who is healthy. I am humbly requesting this court's consideration in releasing me to home confinement. Thank You for your time and consideration to this matter.

Respectfully signed  
Pamela Adkins

COMMENT:

Time is running out for anyone who is considering filing a second or successive § 2255 Motion in light of United States v. Davis, 139 S. Ct. 2319, 2336 (2019), needs to file it by June 24, 2020, which is the one year deadline of when Davis was decided. If you need help, we can help you as our success rate with these motions continues to be very high. We continue to be very successful with compassionate release motions and having people released. Two more of our clients were released last week. This is because we are extremely selective on the cases we take. We turn down about 9 out of 10 cases. It is also very helpful if you can obtain your medical records ahead of time because they are difficult to obtain and can slow the process down. Therefore, you must pursue obtaining them with due diligence because it can be the key that turns the lock to get you released early.

According to the CDC, compassionate release people at high-risk for severe illness from COVID-19 that qualify include, but are not limited to: People 65 years and older; People with chronic lung disease moderate to severe asthma, [COPD], and emphysema; People with serious heart conditions; People with immunocompromised conditions, including cancer treatment, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications; People who are severely obese (body mass index [BMI] of 40 or higher); People with diabetes; People with chronic kidney disease and who are undergoing dialysis; People with liver disease; neurologic disorder, neurodevelopmental, hypertension or intellectual disability; pregnancy; current smoking status; former smoking status; or other chronic disease.

We suggest that you immediately request for a Lookup to see if you think you might qualify for compassionate release if you have any of the above high risk for severe illness listed above and documentation to support it. We are especially keen on and have already had great success with our compassionate release motions. Some of ours are listed above. As we have previously reported, compassionate release has come to be interpreted very broad in many federal courts especially in the age of COVID-19. If you believe that you have a meritorious claim of any kind, please do not hesitate to request an immediate Free Case Lookup
